2023 IEEE Information Theory Workshop

WELCOME TO THE CORSAIR CITY

The **IEEE Information Theory Workshop (ITW)**, a conference of the **IEEE Information Theory Society**, returns to France after 20 years. **ITW 2023** will be organized in **Saint-Malo from 23 to 28 April 2023**.

Port city in Brittany, in France's northwest on the English channel coast, the walled city had a long history of piracy, earning much wealth from local extortion and overseas adventures. It is also the starting point of the famous transatlantic race *Route du Rhum* to the Caribbean.

The venue for this in-person event will be the **Palace of Grand Large**, completely renovated in 2019, facing the large Sillon beach and close to the granite gates of the Corsair City.

CALL FOR PAPERS

Interested authors are invited to submit papers describing previously unpublished contributions in all areas of coding and information theory including, but not limited to:

- Machine learning / deep learning
- Algebraic coding theory
- Modern coding theory
- Quantum coding
- 6G Communications / Massive communications
- Network information theory and network coding
- Cryptography, modern and post-quantum
